

It is my hope that the FCC will continue to enforce more closed captioning for all TV programming. I am at a loss when trying to watch TV without CC. I have a Hearing Impairment and cannot follow along without read the captions.

I am still seeing a fair number of TV stations that do not include captioning. I tend not to watch these stations because it is too hard to follow along. I also wish that more advertisers on TV would caption their commercials. I have the hardest time trying to figure out what they are selling.

Please continue to let me read my television and encourage all stations to make CC available on all programming. Thanks, Pat Ryan
